## FedRAMP Significant Change Request Form: Attachment A – Part 2

**Attachment A  
Instructions:**

This attachment is only required if changing the system's FIPS-199 categorization level from Moderate to High. If this is the case, please complete all subsequent pages. Otherwise, remove these pages before submission.

**Table A-2  
Instructions:**

The controls listed in Table A-2, below, exist in both the Moderate and High baselines; however, the FedRAMP prescribed parameter is different in the High baseline.

When transitioning from Moderate to High, the CSP must update these parameters appropriately in their System Security Plan (SSP). The revised parameter changes the control requirement. The CSP must also revise the control implementation within the system, and the control description within the SSP to align with the new parameter.

Please provide the status of each in the table below.

#### ***Additional Guidance***

*If the significant change is to increase the FIPS-199 system categorization level from Moderate to High, FedRAMP will not approve the change until all High vulnerability findings in the significant change SAR are mitigated to a lower level or remediated.*
